Professional Summary

Motivated and detail-oriented Software Engineering Undergraduate with hands-on experience in **MERN stack development using MongoDB, Express.js, React, and Node.js** as well as **Go (Golang)** and **MySQL** with knowledge of **JWT** authentication, REST APIs, and full-stack application development. Skilled in building responsive web applications, database management, and problem-solving, with a strong interest in software development and modern technologies.

EDUCATION

University of Bedfordshire (SLIIT)	2023 June - 2027
BSc. Computer Science	Colombo
Foundation of Computer Science and Software Engineering (SLIIT Academy)	
Primary and Secondary Education	2012 - 2023
Sri Sumangala National College	Wariyapola

Projects

1. Saloon Website – (2026)

- Developed a full-stack salon booking web application for “Randu Salon” using **Next.js, CSS, JavaScript** for the frontend and **Go(Golang)** for the backend, enabling users to view services and book appointments online.
- Implemented RESTful APIs with Go and integrated database-driven appointment management features, ensuring efficient scheduling, data storage, and smooth communication between frontend and backend systems.

Tech Stack : React, Go, Tailwind CSS, JavaScript, MongoDB

2. New Year Auspicious Time Website (2026 - <https://kaviduhpremasiri-nine.vercel.app/>)

- Developed a responsive “Nakath Charithra” web application using **React, JavaScript, and CSS** to display traditional Sri Lankan auspicious times.
- Implemented client-side time calculations and dynamic updates using **JavaScript** to determine and display accurate Nakath (auspicious) time information in a user-friendly interface.

Tech Stack : React, CSS, JavaScript

3. Leads Preschool Website (MERN) (2025 - <https://leads-preschool.vercel.app/>)

- Developed a preschool learning and classroom management web application to support lesson planning, student engagement activities, and basic progress tracking for early childhood education.
- Implemented a full-stack system using **React, CSS, Node.js, and MongoDB** to manage educational content and store student-related data efficiently.
- Implemented additional features including an **AI chatbot** for user assistance and a **QR code-based attendance system** to improve efficiency in student attendance tracking.

Tech Stack : React, CSS, Node.js, MongoDB, Docker , AWS (basic hands-on experience)

4. AI Desktop Assistance (2025)

- Developed “Kavi AI Desktop Assistant”, a **Python-based voice-enabled desktop application** with a **Tkinter interface** to provide an interactive user experience.
- Implemented features including **speech recognition**, **text-to-speech responses**, web automation, time queries, greetings, and personalized user interactions using rule-based AI logic.

Tech Stack : Python, Tkinter, JavaScript

5. Cloth Shop Website

- Developed a full-stack clothing e-commerce website using **HTML, CSS, and JavaScript** for the frontend, and **PHP with MySQL** for the backend and database.
- Implemented core e-commerce features including product browsing, shopping cart functionality, user authentication, and order management with dynamic database-driven content.

Tech Stack : HTML, CSS, JavaScript, Php, MySQL

SKILLS

- **Programming Languages** – React, Go, Node.js, Java, Python, R, Tailwind CSS, HTML, CSS3, JavaScript
- **Cloud Computing** – AWS, Railway, Vercel
- **Containerization and orchestration** – Docker
- **AI & Developer Tools:** Cursor AI, Claude, ChatGPT, AI-assisted software development
- **OOP concepts** (strong in java)
- **Databases** : MongoDB, MySQL
- **Operating Systems** – Windows, Unix based OS (Linux)
- **Version control systems** – git
- **Microsoft Power BI** – DAX queries, report generation, Data analytics
- **Shell scripting / Power Shell**
- **Soft Skills** : Team Collaboration, Project Management, Analytical Thinking, Documentation
- **Languages Spoken:** English, Sinhala
